

Waterfield House Practice

Application to use Patient Access for Online appointment booking and prescription requests and text reminders

A system called Patient Access will allow you to access the practice online by:-

- Checking, booking and cancelling appointments.
- Checking your medication and ordering repeat prescriptions.
- Updating your contact information, including mobile phone number and email address.

Using the internet, you will be able to view a selection of the available appointments at any time of day or night and book the best one for you without telephoning the surgery. We will not be releasing all our appointments online as not everyone will be able to use the system.

Your personal confidentiality is very important to us. All information is encrypted and protected using the highest internet security. About one in four GP practices in the UK use this service.

To use the Patient Access features, you need a PIN and Access ID. To get these, please complete the form below and visit the practice with photographic identification (such as a driver license or passport) and ask to be registered for Patient Access.
